Abstract:

The second annual Ride Share Conference was held last year at the Goddard Space Flight Center. The goal was to again bring together the ride sharing community to focus on specific processes, developments, and technologies that enable more frequent and low cost secondary rides. This year, the topics will focus on known rideshare opportunities and innovative approaches to providing affordable access to space for small payloads.

Cosponsored by the
NRO/Corporate Operations
Office/Space Launch and the
Naval Postgraduate School

Topics Include:

- Payload Brokering Panel
- Commercial Launch Vehicle Vendor Ride Share Opportunities
- Shuttle Carriers for Small Payloads
- Innovations in Small Payload/Secondary Adapters
- Commercial Spacecraft Future Mission Opportunities
- On-Orbit Maneuver and Transfer Vehicles
- New Low-Cost Launch Vendors
- Commercial/Civil Launch Sites and Spaceport Facilities
- Access To Space Web Site Demonstration
- Naval Postgraduate School Small Payload Program
- New Venture to Integrate Education and the Workforce Around Space Programs
